

Chirag Lathigara

Dubai, United Arab Emirates | +971-503803493 | lathigarachirag@gmail.com

Objective

- An accomplished professional with extensive expertise in a broad suite of technologies especially in Microsoft Azure, SharePoint, ASP.NET MVC with Web API, HTML5, CSS3, JavaScript, jQuery, SQL, Automation using Flow / developing custom tools, and Power BI, along with project management.
- Proven track record as a visionary with awareness of emerging technologies to adapt it for better product and customer growth; proficient at project management with reputation for leading teams towards peak performance; seeking a challenging position to drive realization of business targets with customer success, while maintaining a firm focus on assured bottom line gains and distinguished company performance.

Education

- Bachelor of Engineering (Information Technology) | June 2014 | University of Mumbai

Skills & Abilities

- Web Development: ASP.NET MVC, HTML5, CSS3, JavaScript, jQuery, Bootstrap
- Web Services: ASP.NET Web API using C#
- Cloud: Windows Azure (App Services, Web Jobs, Data Factories, Azure SQL, Storage, API Management, Virtual Machines, and Function Apps), Office 365 (SharePoint, Flow, Office Apps, OneNote, OneDrive, Skype for Business, and Outlook)
- Backend: SQL Server, Document DB (Azure COSMOS DB)
- Reporting: Power BI
- Project Management: Requirement Gathering, System Architecture Design, Planning and Estimation, Coordinating with teams across different geo-location, Agile Methodology, Visual Studio Online (GIT/TFS)

Experience

SHAREPOINT DEVELOPER | ENGIE | APRIL 2018 – PRESENT

Highlights:

- Working as a SharePoint expert and cloud architect
- Provided the best architecture for building a new cloud based system
- Subject Matter Expert for SharePoint, front end and automation.
- Established the high standard for delivering the product in very short time with the best quality without compromising quality and received very positive feedback from the users.

Key Responsibilities:

- Prepare and provide the best cloud architecture using SharePoint, Azure and various others Office 365 components which fulfills the users need.
- Provide end to end project delivery plan.
- Identify different areas for automation and provide the solution for the same.
- Design system architecture and create approaches to fulfill the requirements.
- Build the centralize system on SharePoint online for managing documents, events and data of different departments within the company
- Create custom solution in SharePoint for the complex requirements using SharePoint Designer, HTML5, CSS3, jQuery and C#.NET.
- Develop Power BI reports for visualizing the company's data and flow.

SENIOR SOFTWARE ENGINEER | DELOITTE US | NOVEMBER 2017 – MARCH 2018

Highlights:

- Working on 2 different projects in parallel.
- Aligned the project in terms of agile processes for timely and reliable solution with high quality output.
- Subject Matter Expert for Microsoft Azure and C#.NET and Web API.
- Established the high standard for adapting new technologies for providing more benefits to customers and delivering the output in very less team without compromising quality.

Key Responsibilities:

- Prepare the end to end project delivery plan with manager for smooth delivery of project.
- Feasibility check for the different requirements and estimation for the same.
- Design system architecture and create approaches to fulfill the requirements.
- Extract data from different sources like Azure Blob, FileShare and Excel, process the same in Azure HDInsights cluster using Hive Query Language.
- Create Azure Data Factory custom activity for custom operations in data using C#.NET.
- Load data to Azure SQL DW and then to Azure Analysis Service tabular model.
- Develop Power BI Reports.
- Automate deployment of Azure Data Factory and static HQLs to Azure Blob.

SENIOR SOFTWARE ENGINEER | MAQ SOFTWARE | JUNE 2014 – NOVEMBER 2017

Highlights:

- Worked on more than 8 projects of different domains and technologies.
- Established project delivery to enable timely and reliable solution with high quality output.
- Established the high standard for adapting new technologies for providing more benefits to customers and delivering the output in very less team without compromising quality.
- Handled multiple stakeholders and teams across different geo-location.
- Conducted trainings in the company on project delivery processes, development best practices, and Power BI custom visuals.
- Achieved accelerated business growth in Power BI custom visual front within 2 months.
- Awarded for exemplary performance towards managing and implementing several crucial projects for a leading client of the company.

Key Responsibilities:

- Work closely with the client to understand the requirements and expectations, identifying and resolving issues faced during development, deployment and testing.
- Prepare business requirement documentations and technical specification documentations.
- Design system architecture and create approaches to fulfill the requirements.
- Development of reporting portal using ASP.NET MVC and HTML5, CSS3, JavaScript, JQuery & Bootstrap with SQL Server as backend. Deployment of application on Azure (Azure App Services for web application and Azure SQL for backend).
- Development of RESTful web services using ASP.NET Web API and create subscription based model using Azure API Management.
- Development of Azure Data Factory linked services, datasets, and pipelines for pulling data from different sources like Excel, SharePoint, MSSQL DB, etc. and pushing to Azure SQL DB.
- Development of custom activity using C#.NET for Azure Data Factory pipeline for performing custom operations/transformations while transferring data from source to destination.
- Development of SharePoint master pages, page layouts, and pages by fetching data from SharePoint list and libraries using JSOM (JavaScript Object Model), CSOM (Client Side Object Model), and SharePoint Rest API.
- Development of SharePoint workflows for breaking the list item permissions.
- Migrate SharePoint components from on premise to online using ShareGate tool and by creating custom utility using C#.NET.
- Development of Power BI Custom Visuals and publish it to Office store. Also upgrade existing custom visuals to latest Visual API version.
- Automate deployment of various components using Build and Release Management in Visual Studio Online.
- Provide support for post-production activities and conduction knowledge transfer with external teams.

Key Certifications

- Microsoft Certified Professional 70-486: Developing ASP.NET MVC Web Applications
- Microsoft Certified Professional 70-487: Developing Windows Azure and Web Services
- Microsoft Certified Professional 70-461: Querying Microsoft SQL Server 2012/2014
- Microsoft Certified Professional 70-761: Querying Data with Transact-SQL (Microsoft SQL Server 2016)
- Microsoft Certified Professional 70-768: Developing SQL Data Models

Additional Information

- Date of Birth: 11 October, 1992
- Nationality: Indian
- Social Impact: Sanjeevani Medical Charity- Volunteer (2008-2014)
- Personal Interest: Travelling, Socializing and listening to music
